Summary

Software Engineer with **2+ years of experience** building **full-stack web applications** and **automation tools** across data-intensive and client-facing products. Proficient in **Python, React, Next.js, Node.js, Django, and PostgreSQL**. Hands-on experience with **Docker, AWS Lambda, REST APIs, and cloud infrastructure**. Proven ability to deliver end-to-end projects — from requirement gathering and UI design to deployment — with strong cross-functional collaboration and client communication skills.

Experience

IT Engineer & Web Developer

Jun 2025 – Present

Compass Global Logistics (CGL) — Bangalore, India

- Rebuilt the **SleeveTech** company website from scratch using **React / Next.js** with modern UI, animations, and integrated chatbot functionality; managed end-to-end client communication, requirement gathering, and delivered a **~\$1,000 project** including SOW and pricing proposals.
- Developed an **Avaya IP Automation tool** using **Python and Batch scripting**, exposed as a custom CLI command (`avaya-ip`); eliminated repetitive manual ping operations and enabled instant lookup of used IPs, free IPs, and assigned stations across the office network.
- Building an internal **AI Knowledge Assistant** using **Microsoft Copilot Studio + SharePoint** to automate IT troubleshooting workflows and reduce resolution time for recurring support tickets.
- Audited and resolved **broken navigation, 404 errors, and routing issues** on the ARC website, restoring production stability and improving overall usability.
- Mentored **5+ web development interns** (including a remote intern from Oman), assigning structured tasks in **Next.js, MySQL, WordPress, and UI design**; reviewed deliverables and reported evaluations to management.

Software Engineer

Feb 2024 – Apr 2025

Unicourt Inc — Mangalore, India

- Built and maintained **data extraction and processing pipelines** for large-scale **US court data** using **Python and Django**, automating collection, parsing, and structuring of legal documents.
- Optimized **PostgreSQL queries** for high-volume datasets, improving data retrieval performance and reducing query latency.
- Containerized services using **Docker** and deployed event-driven functions on **AWS Lambda** to handle scalable, serverless request management in production.
- Ensured **data integrity, validation, and compliance** with industry standards across all pipeline outputs.

Software Engineering Intern

Aug 2023

Evotech.Global

- Developed '**Unifeed**' — a collaborative platform for students, campuses, and companies — using the **MERN stack and React Native**.
- Built and optimized **RESTful APIs** with **Node.js and Express.js**; designed a scalable **MongoDB** database schema for efficient user data management.
- Integrated **real-time messaging and push notifications** to enhance platform engagement.

SEO Specialist & Web Developer

2024

Urbanfit E-commerce Website

- Performed **on-page SEO** across 10+ product pages using **SEMrush, Google Search Console, and Ubersuggest**; achieved **Google Page 1 rankings** for multiple products in a competitive footwear niche.
- Targeted **long-tail keywords** (e.g., "New Balance shoes under 5000") to drive niche organic traffic and improve conversion-focused visibility.

Projects

KampusFlow — School Management SaaS kampusflow.in	2025 – Present
• Co-founded a school management SaaS built on Next.js and MySQL; set up and managed a VPS for hosting, configured MySQL in production, and established CI/CD deployment via GitHub. • Led all DevOps and infrastructure decisions for the team; provided technical guidance on architecture, debugging, and data structure design to unblock development. • Acquired 3 paying customers across Karnataka — product is live and actively maintained.	
Leadify Pro — SaaS Lead Generation & CRM Tool leadifypro.pixelroot.in	May 2026
• Built and launched a full-stack SaaS product using Next.js and MySQL that helps freelancers and agencies find local businesses via the Google Places API, filter leads by missing contact details (e.g., no website), and initiate WhatsApp outreach with pre-filled templates. • Implemented a built-in CRM pipeline tracker to manage leads from discovery through follow-up to client conversion, replacing manual Excel-based workflows. • Deployed frontend and backend on Render with Aiven as the managed MySQL database; configured CI/CD via GitHub for automated deployments on every push.	
AI Recipe Generator App	Apr 2025
• Built and deployed a cross-platform mobile app using React Native + Strapi CMS with Google Sign-In authentication and dynamic AI-based recipe generation.	

Education

BE in Computer Science and Engineering PA College of Engineering, Mangalore, Karnataka	2020–2024 CGPA: 8.5
Pre University College VPUC Vittal, Vittal, Karnataka	2018–2020 Percentage: 85%

Skills

- **Languages:** Python, JavaScript (ES6+), TypeScript, C++, SQL
- **Frontend:** React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, Django, REST API Design, PHP, Strapi CMS
- **Databases:** PostgreSQL, MySQL, MongoDB
- **DevOps & Cloud:** Docker, AWS Lambda, GitHub, CI/CD basics
- **AI & Automation:** Microsoft Copilot Studio, SharePoint, Make.com, OpenCV, GPT API Integration, N8N
- **SEO Tools:** SEMrush, Google Search Console, Ubersuggest, Google Analytics
- **Other:** WordPress, Data Structures & Algorithms, Agile/Jira, Technical Documentation, Excel

Achievements

- **Won 1st place** in HacktoFuture Hackathon at St. Joseph Engineering College, Mangalore.
- **Shortlisted** for the ADC National Level Project Exhibition at IIIT Bangalore, showcasing skills in project development and presentation at a national competition.
- **Completed Hacknight Hackathon** — built and delivered a working project within a 24-hour timeframe as part of a 4-member team.
- **Achieved 2nd prize** in the IT Quiz competition at ‘**EPITOME 2022**’, a national-level intercollegiate IT fest organized by AIMIT, Mangalore.
